

FTTH network ePlanner

COMMScope®

INTRODUCTION

CommScope FTTH ePlanner

Welcome to the CommScope FTTH ePlanner. The purpose of this document is to guide UK network planners and engineers through the design, selection, and identification of the necessary components for fibre optic networks that best suit their specific application needs.

CommScope is a world leader in communication infrastructure solutions. A global brand with a local approach, we take pride in manufacturing fibre cable, drop cables, and fibre patch cords in our North Wales plant. This local capability gives us operational flexibility, regional focus, and greater speed, and ensures that our UK customers need make no compromises in product quality or availability. They get the products they need when they need them.

This ePlanner brings together CommScope's four-decade experience shaping FTTH networks, solutions, and products. While not a comprehensive design tool, the information here will aid with the understanding of architecture and topology options available, pros & cons for each, and critical factors to consider when designing a network. 17 different network topologies, from the central office to the MDU, are presented. Each solution includes schematics, typical application recommendations, and a list of the most common part numbers. Please note: the network topologies, configurations, and product selection in this ePlanner are designed solely for our UK customers.

With this ePlanner, our goal is to facilitate and speed your network design process. We are happy to schedule time with you, answer any questions you might have, and provide additional assistance.

The ePlanner is organized in 3 main sections

Section 1: Design elements—Besides a glossary, this section covers several useful design considerations and technologies. We recommend a careful reading of this prior to getting into the next two sections.

Section 2: Network topology decision trees—Find the right topology for your application, uses built-in logic to guide the user through various topologies, pros & cons, and most common CommScope products used for each of the solutions.

Section 3: Network topology options—Quick navigation to the selected topology, is ideal for fast navigation to the configuration of choice and the most common products associated with it. Both hot links and page numbers can be used for navigation.

Important navigation tips >>

 CONTACT COMMSCOPE

Section 1: Design elements

Get started here with definitions, designs, & technologies

- Main inputs and outputs for FTTH network design 5
- FTTH infrastructure deployment options 6
- How demographics affect network models 7
- Main topologies options—pros and cons 8
- Standard or hardened technologies. 9
- Splicing vs. preconnectorization vs. field technologies 10
- Traditional vs. Rapid Technology 11

Important navigation tips >>

Section 2: Network topology decision trees

Find the right topology and products for your application

- FTTH network topologies 13
- Feeder and distribution network topologies decision tree 14
- SFU drop network topologies decision tree 15
- MDU drop network topologies decision tree 16

Section 3: Network topology options

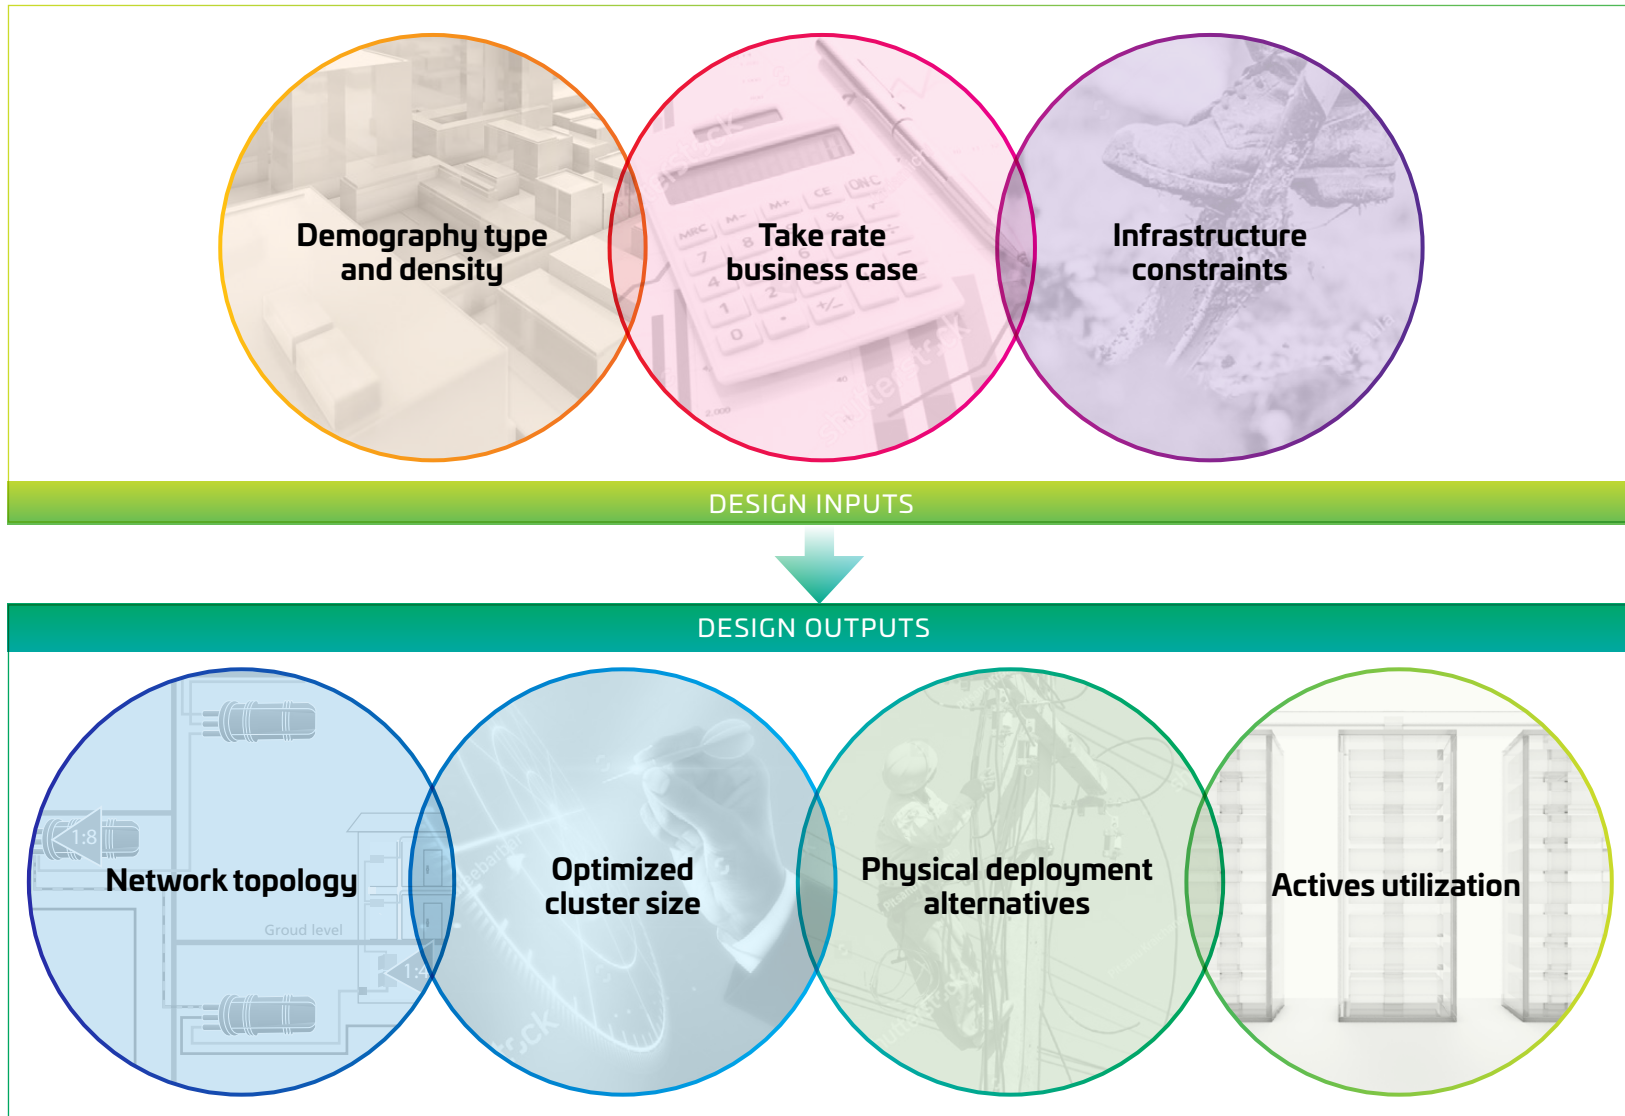

Quick navigation to topologies and products

- Feeder and distribution network topologies 18
 - 01 Centralized, standard, mid-span 19
 - 02 Centralized, hardened, pre-cabled 26
 - 03 Centralized, hardened, mid-span 33
 - 04 Centralized, hardened, mix 40
 - 05 Distributed, standard, mid-span 48
 - 06 Distributed, hardened, pre-cabled 55
 - 07 Distributed, hardened, mid-span 62
 - 08 Distributed, hardened, mix 69
- SFU drop network topologies 77
 - 01 Standard, preconnectorized with transition box 78
 - 02 Standard, preconnectorized 81
 - 03 Hardened, preconnectorized with transition box 83
 - 04 Hardened, preconnectorized 86
- MDU drop network topologies 88
 - 01 Traditional MDU 89
 - 02 Rapid without split 91
 - 03 Rapid with split 93
- Central office configurations 95
 - 01 Cross-connect ODF configuration 96
 - 02 Panel-in-a-rack—MFPS (office or cabinet) 98

Section 1

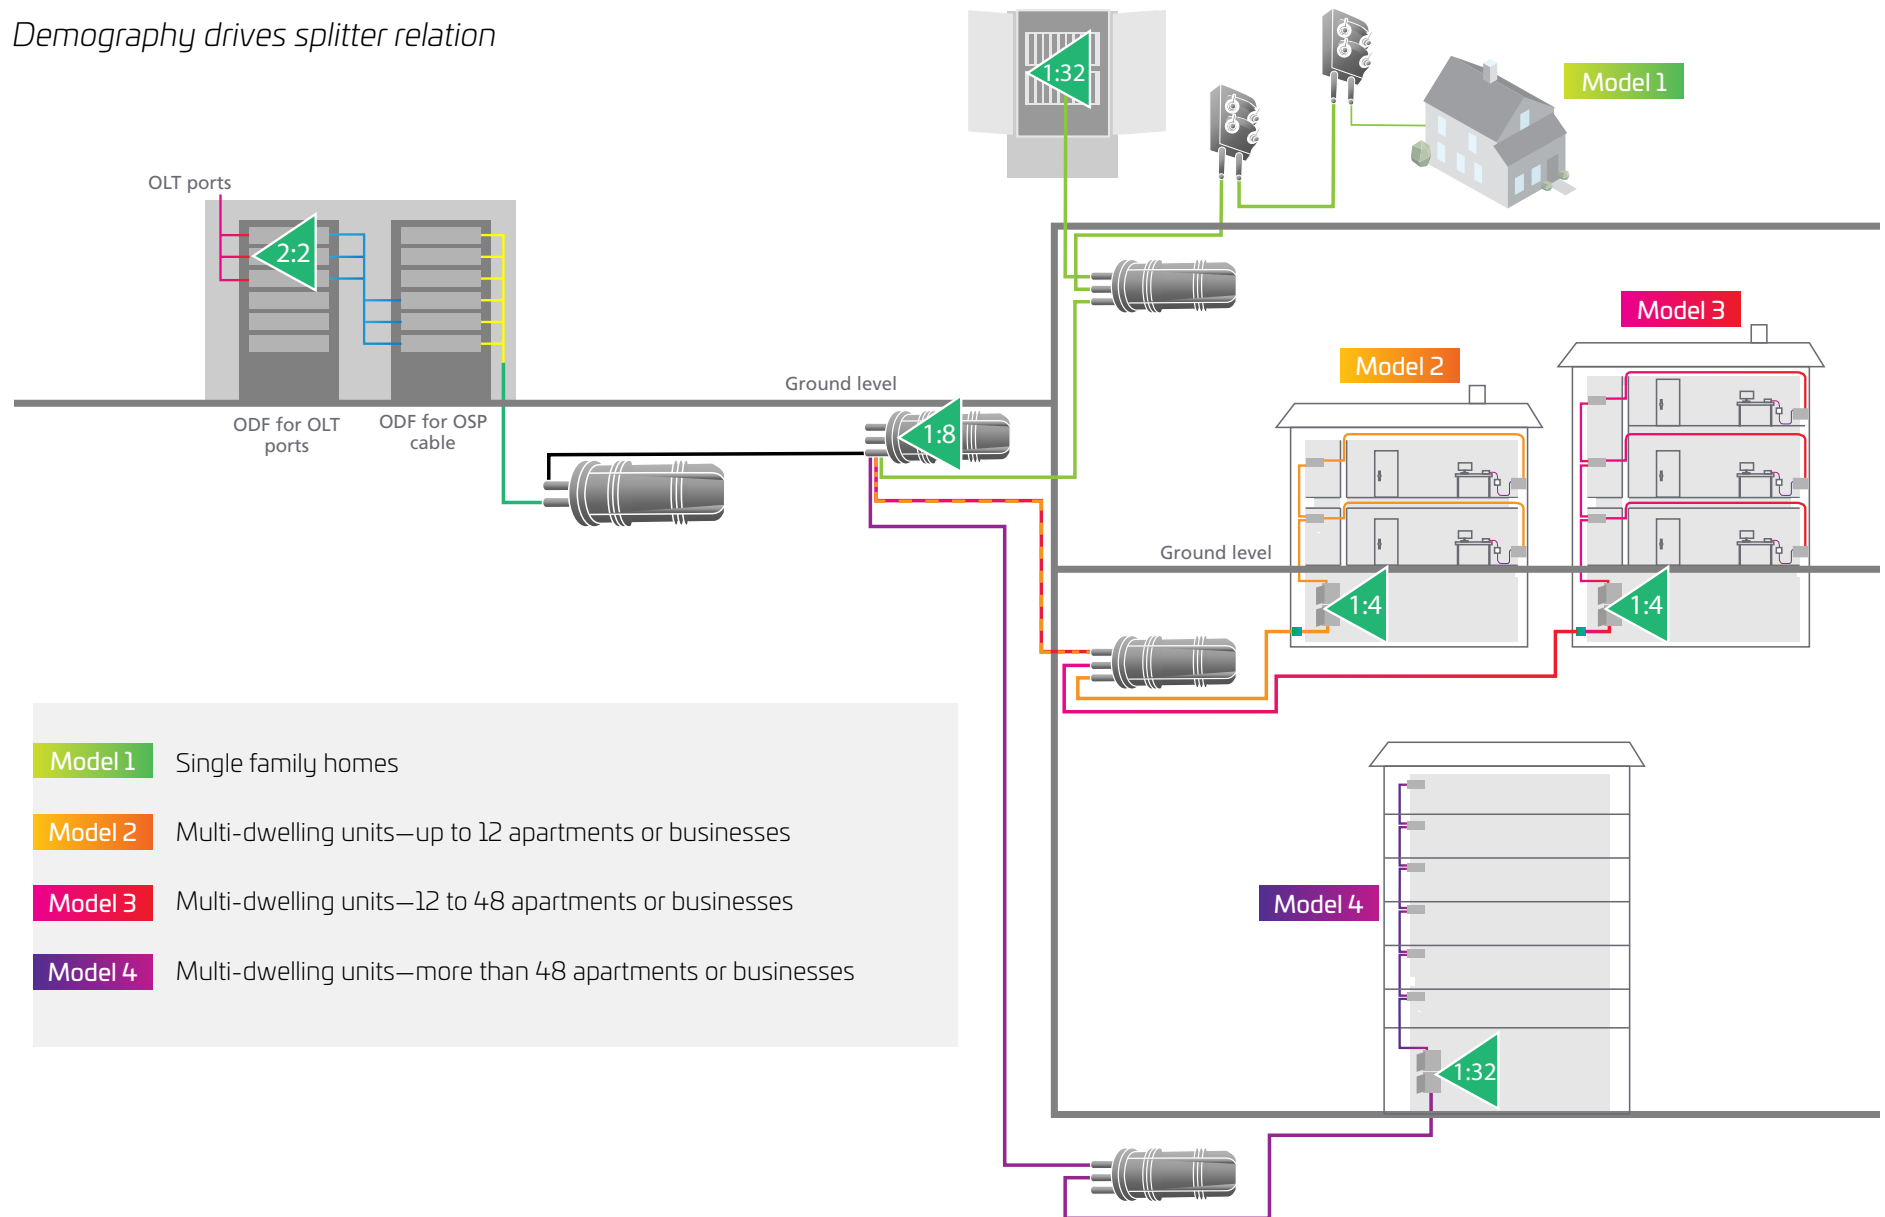

Design elements

Standard Digging	Poles	Utility Infrastructure	Microtrench	Facades
				
PROS				
<ul style="list-style-type: none"> • Longterm solution 	<ul style="list-style-type: none"> • Lower cost, estimated 20% of standard digging 	<ul style="list-style-type: none"> • Existing Infrastructure, lower cost 	<ul style="list-style-type: none"> • Lower cost, estimated 50% of standard digging 	<ul style="list-style-type: none"> • Lower cost, estimated 20% of standard digging
CONS				
<ul style="list-style-type: none"> • Expensive, depending on terrain, up to 100 Euros per meter 	<ul style="list-style-type: none"> • Permission, new poles not allowed in many countries 	<ul style="list-style-type: none"> • Potential safety considerations and longer approval times 	<ul style="list-style-type: none"> • Maintenance, risks 	<ul style="list-style-type: none"> • Not allowed in many countries

Demography drives splitter relation

- Model 1** Single family homes
- Model 2** Multi-dwelling units—up to 12 apartments or businesses
- Model 3** Multi-dwelling units—12 to 48 apartments or businesses
- Model 4** Multi-dwelling units—more than 48 apartments or businesses

Centralized split topology

Centralized Split topology uses a single stage splitter (typically 1:32 in GPON,) located in the outside plant. Typically, this splitter can be either a connectorized splitter in an outdoor cabinet or a spliced splitter in an underground closure. The input fibre for a centralized splitter comes from an OLT port in the central office. Sometimes, there is also a first 1:2 splitter in the central office. The output fibres go directly to each home.

Pros

- Pay as you grow
- Easier to change with future technology changes
- Simpler to monitor and maintain

Cons

- More distribution fibre needed

Distributed split topology

Distributed Split topology uses two, and in rare cases, even as many as three levels of splitting. The splitters are located in the outside plant network. This approach may use a 1:8 spliced splitter residing in an underground closure, directly connected to an OLT. The second level can be either a spliced or a connectorized splitter, depending on the network topology.

Pros

- Lower CAPEX
- Fast customer activation

Cons

- Higher active CAPEX
- Harder to change in the future
- Harder to monitor and maintain

Standard connectivity

Optical connectors/adapters and splices are inside the closures. They require re-entry every time a new customer needs to be connected.

Pros

- Commonly used in the industry
- Known installation practices

Cons

- Requires closure opening to connect customers with risk of poor re-sealing
- Risk of disturbing service while touching fibres when connecting new customers
- Cable routing depends on the installers' expertise

Hardened connectivity

Outside adapters are used to access the inside connectors. The terminals require no opening when connecting new customers.

Pros

- Day 1 splicing only without disturbance of existing customers for new connections
- Sealed and protected connections above and underground
- Faster and easier drop cable connections

Cons

- More complex logistics for drop cables

Fusion splicing

Pros

- Highest performance

Cons

- Requires highly skilled technicians
- No flexibility and maintenance points

Connectorized plant

Pros

- Ease of installation

Cons

- Higher CAPEX

Field installable connectors

Pros

- No need for expensive splice equipment

Cons

- Higher losses
- Poor reliability

Traditional MDU topology

Uses multifibre riser cable that is spliced and connectorized in a terminal box located in the basement. This cable is opened at every floor and spliced/connectorized inside a distribution floor box.

Pros

- Used widely in the industry
- Lower CAPEX

Cons

- Requires splicing and cable preparation on every floor level
- Higher risk of fibre cable failures and disconnections

Rapid MDU topology

Uses CommScope Rapid Reel technology and provides an alternative riser concept in MDUs. Each floor distribution box has its own cable to the basement terminal box.

Pros

- Eliminates the need to pre-measure for and order fixed-length intra facility cable
- Reduces installation time by 60%
- Solves slack storage problem because any unused cable is stored on the internal reel

Cons

- Higher CAPEX
- Not effective in buildings where ducts are too narrow or crowded

Section 2

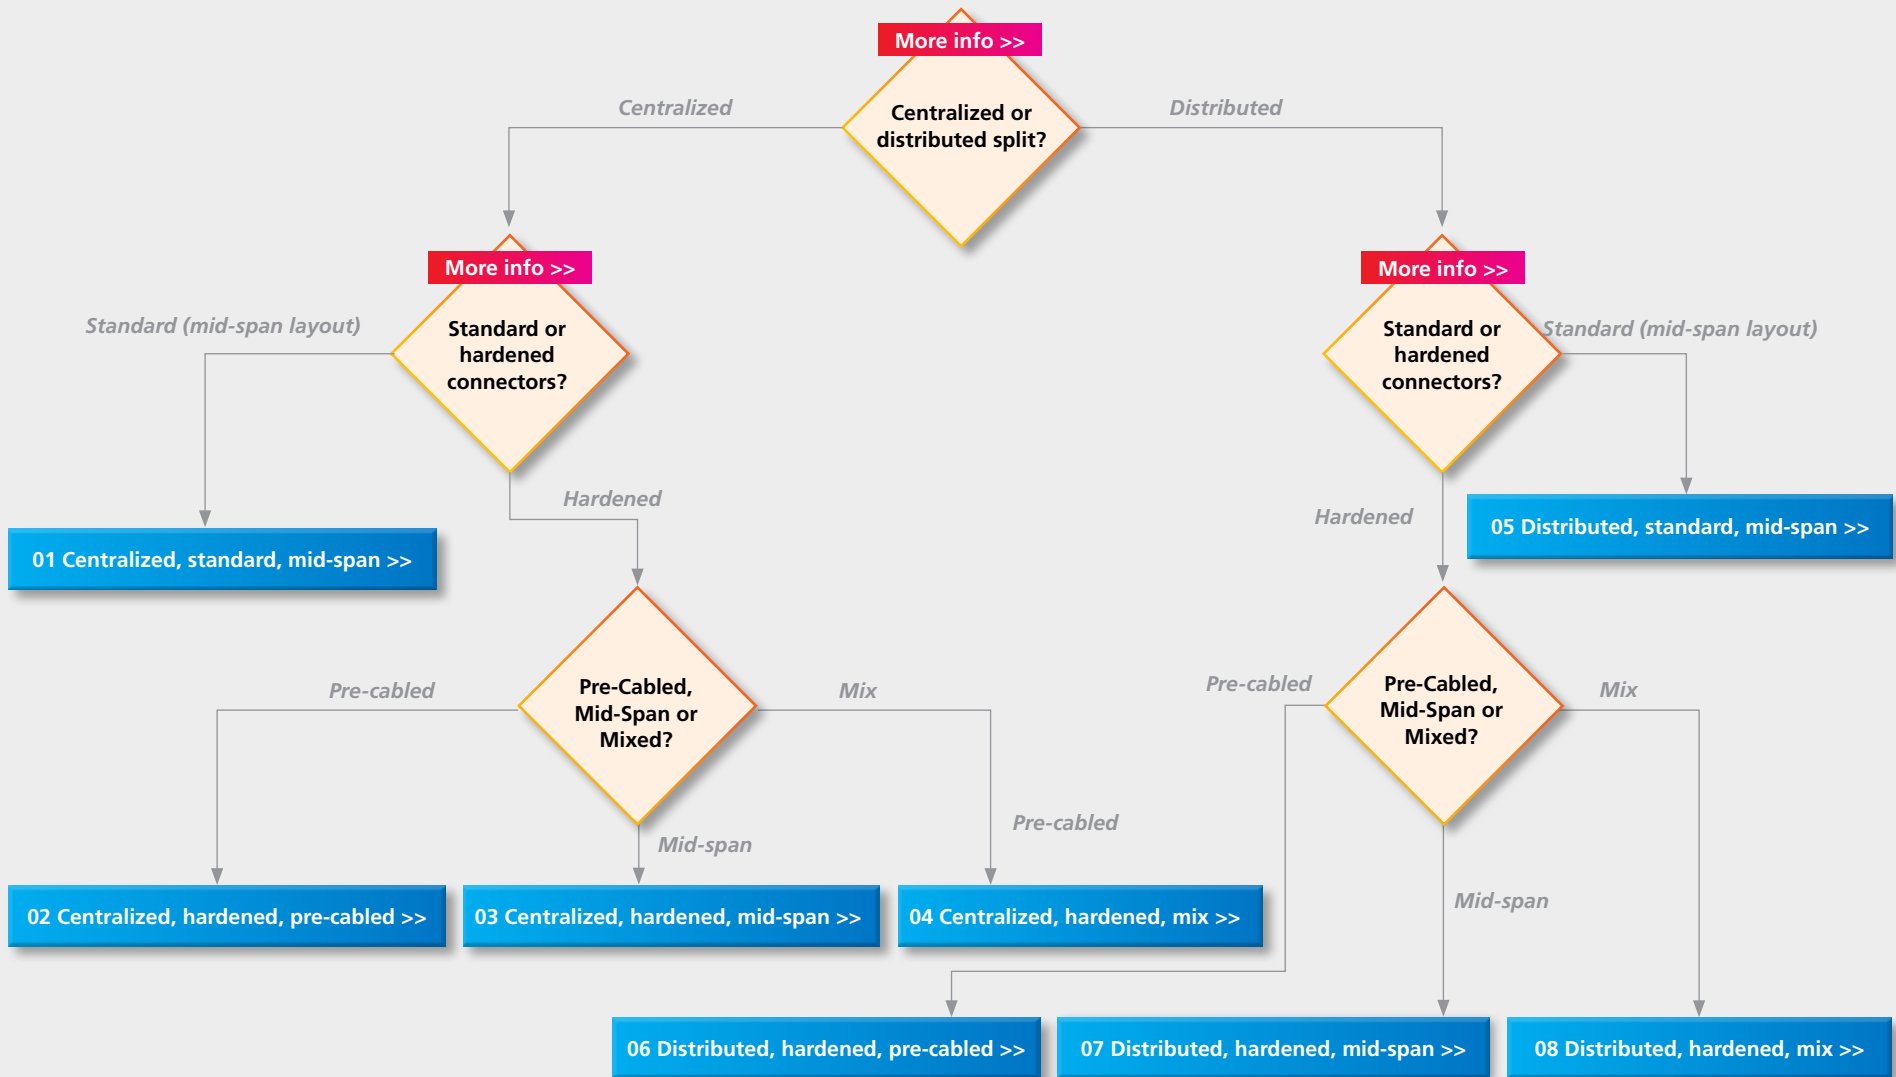

Network topology decision trees

Inside plant	Outside plant	Customer connection	
Central Office	Feeder and Distribution	SFU Drop	MDU Drop
ODF configuration	Centralized	Standard	Centralized
01 Cross-connect ODF configuration	01 Standard, mid-span	01 Preconnectorized with transition box	01 Traditional MDUs
	02 Hardened, pre-cabled	02 Preconnectorized	02 Rapid without split
	03 Hardened, mid-span		03 Rapid with split
	04 Hardened, mix		
	Distributed	Hardened	
	05 Standard, mid-span	03 Preconnectorized with transition box	
	06 Hardened, pre-cabled	04 Preconnectorized	
	07 Hardened, mid-span		
	08 Hardened, mix		
Fibre panel in central office or cabinet			
02 Panel in-a-rack—MFPS (office)	02 MFPS (cabinet)

Tenio—most common parts

Part number	Description
Tenio domes fully loaded with trays	
TENIO-B6-S12-12-N	Small size Tenio closure, loaded with 12 trays, 12 splices each tray.
TENIO-C6H-SLE-12-N	Large size Tenio closure, loaded with 12 trays, 24 splices each.
Cable sealings	
TENIO-SKG5-2/4	Sealing for cables between 2 and 4 mm (5 cables per sealing)
TENIO-SKG4-3/6	Sealing for cables between 3 and 6 mm (4 cables per sealing)
TENIO-SKG3-5/8	Sealing for cables between 5 and 8 mm (3 cables per sealing)
TENIO-SKG3-7/10	Sealing for cables between 7 and 10 mm (3 cables per sealing)
TENIO-SKG2-9/12	Sealing for cables between 9 and 12 mm (2 cables per sealing)
TENIO-SKG2-11/14	Sealing for cables between 11 and 14 mm (2 cables per sealing)
TENIO-SKG2-13/16	Sealing for cables between 13 and 16 mm (2 cables per sealing)
TENIO-SKG-DUMMY	Sealing for cables between 2 and 4 mm (5 cables per sealing)
CTUs (cable termination units)	
TENIO-CTU-S	Cable retention kit, used with cable seals TENIO-SKG5-2/4, TENIO-SKG4-3/6
TENIO-CTU-L	Cable retention kit, used with cable seals TENIO-SKG3-5/8, TENIO-SKG3-7/10, TENIO-SKG2-9/12, TENIO-SKG2-11/14, TENIO-SKG2-13/16, TENIO-SKG3-3/5x6/9
Mounting Bracket	
TENIO-MOBRA	Mounting bracket for wall and pole mount
External cable fixation bracket	
TENIO-EXT/CF	External cable fixation bracket

FIST-GCO2—most common parts

Part number	Description
FIST-GCO2 Dome closure without trays	
FIST-GCO2-BC8-NN	FIST-small-GCO2-BC8 basic closure, no valve (can be loaded up to 56 trays, 672 splices max.)
FIST-GCO2-BD8-NN	FIST-large-GCO2-BD8 Basic closure no valve (can be loaded up to 80 trays, 960 splices max.)
Splice trays	
FIST-SOSA2-8SLE-S	WGP 8UMS and 8SLE Splice trays (96 splices, 12 splices each tray)
FIST-SOSA2-4SLE-S	WGP 4UMS and 4SLE Splice tray (48 splices, 12 splices each tray)
Cable sealings	
FIST-RSKG-4F	FIST-Seal-RSKG-4F (11x6.5 Flat four cable)
FIST-RSKG-4	FIST-Seal-RSKG-4
FIST-RSKG-2	FIST-Seal-RSKG-2
FIST-RSKG-1	FIST-Seal-RSKG-1 (11-14 one cable)
FIST-OSKG	FIST-Seal OSKG Oval Seal
Mounting brackets	
FIST-MOBRA-8-FIX	Wall and Pole mounting kit
FIST-GCOG-POLE-KIT	Hose Clamp for pole mounting, used with MOBRA kit

FIST Modular Splice closure—most common parts

Part number	Description
FIST-MSD Dome closure without trays	
FIST-MSD-C8-N	MSD dome closure C-size, no test valve. No trays (capacity for 40 trays, 480 splices)
FIST-MSD-D8-N	MSD dome closure D-size, no test valve. No trays (capacity for 72 trays, 864 splices)
FIST-MSD-E8-N	MSD dome closure E-size, no test valve. No trays (capacity for 104 trays, 1248 splices)
Splice Trays	
FIST-SOSA2-8SLE-S	WGP 8UMS and 8SLE Splice trays (96 splices, 12 splices each tray)
FIST-SOSA2-4SLE-S	WGP 4UMS and 4SLE Splice tray (48 splices, 12 splices each tray)
Cable sealings	
MSC-SKG8-1/5	Sealing kit for 8 cables of diameters between 1 and 5 mm
MSC-SKG8-4/7-11	Sealing kit for 4 cables of diameters between 4 and 11 mm
MSC-SKG3-6/14	Sealing kit for 3 cables of diameters between 6 and 14 mm
MSC-SKG2-14/18	Sealing kit for 2 cables of diameters between 14 and 18 mm
MSC-SKG2-18/22	Sealing kit for 3 cables of diameters between 18 and 22 mm
MSC-SKG1-21/27	Sealing kit for 1 cable of diameter between 21 and 27mm
MSC-SKG-DUMMY	Dummy seal
Cable retention units	
CTU-S	Cable termination unit for cables up to 7 mm
CTU-L	Cable termination unit for cables up to 16 mm
CTU-G	Cable termination unit for cables up to 27 mm
CTU-G-GRND	Cable termination unit for cables up to 27 mm, with grounding wire
Closure mounting bracket	
MSC-MOBRA	Wall/pole mounting kit
External fixation bracket	
MSC-EXT/CF	External cable/tube fixation bracket, including 8 tie wraps and 2 hose clamps

Cable sealings	
MSC-SKG8-1/5	Sealing kit for 8 cables of diameters between 1 and 5 mm
MSC-SKG8-4/7-11	Sealing kit for 4 cables of diameters between 4 and 11 mm
MSC-SKG3-6/14	Sealing kit for 3 cables of diameters between 6 and 14 mm
MSC-SKG2-14/18	Sealing kit for 2 cables of diameters between 14 and 18 mm
MSC-SKG2-18/22	Sealing kit for 3 cables of diameters between 18 and 22 mm
MSC-SKG1-21/27	Sealing kit for 1 cable of diameter between 21 and 27mm
MSC-SKG-DUMMY	Dummy seal
Cable retention units	
CTU-S	Cable termination unit for cables up to 7 mm
CTU-L	Cable termination unit for cables up to 16 mm
CTU-G	Cable termination unit for cables up to 27 mm
CTU-G-GRND	Cable termination unit for cables up to 27 mm, with grounding wire
Closure mounting bracket	
MSC-MOBRA	Wall/pole mounting kit
External fixation bracket	
MSC-EXT/CF	External cable/tube fixation bracket, including 8 tie wraps and 2 hose clamps

Optical splitters in closures: most common parts

Part number	Description
OCC1P-10200-NNNQNF	Splitter 1:2 plc, 250um, unterminated (for Tenio, FIST-GCO2 and FIST-MS)
OCC1P-10400-NNNQNF	Splitter 1:4 plc, 250um, unterminated (for Tenio, FIST-GCO2 and FIST-MS)
OCC1P-10800-NNNQNF	Splitter 1:8 plc, 250um, unterminated (for Tenio, FIST-GCO2 and FIST-MS)
OCC1P-11600-NNNQNF	Splitter 1:16 plc, 250um, unterminated (for Tenio, FIST-GCO2 and FIST-MS)
OCC1P-13200-NNNQNF	Splitter 1:32 plc, 250um, unterminated (for Tenio, FIST-GCO2 and FIST-MS)
OCC1P-16400-NNNQNF	Splitter 1:64 plc, 250um, unterminated (for Tenio, FIST-GCO2 and FIST-MS)
FIST-FSASA3-132-1P-S-IE05	1:32 Splitter (for FIST-GCO2 and FIST-MS)
FIST-FSASA3-SC-116-1P-S	1:16 Splitter (for FIST-GCO2 and FIST-MS)
FIST-FSASA3-SC-104-2P-S	1:4 Splitter (for FIST-GCO2 and FIST-MS)

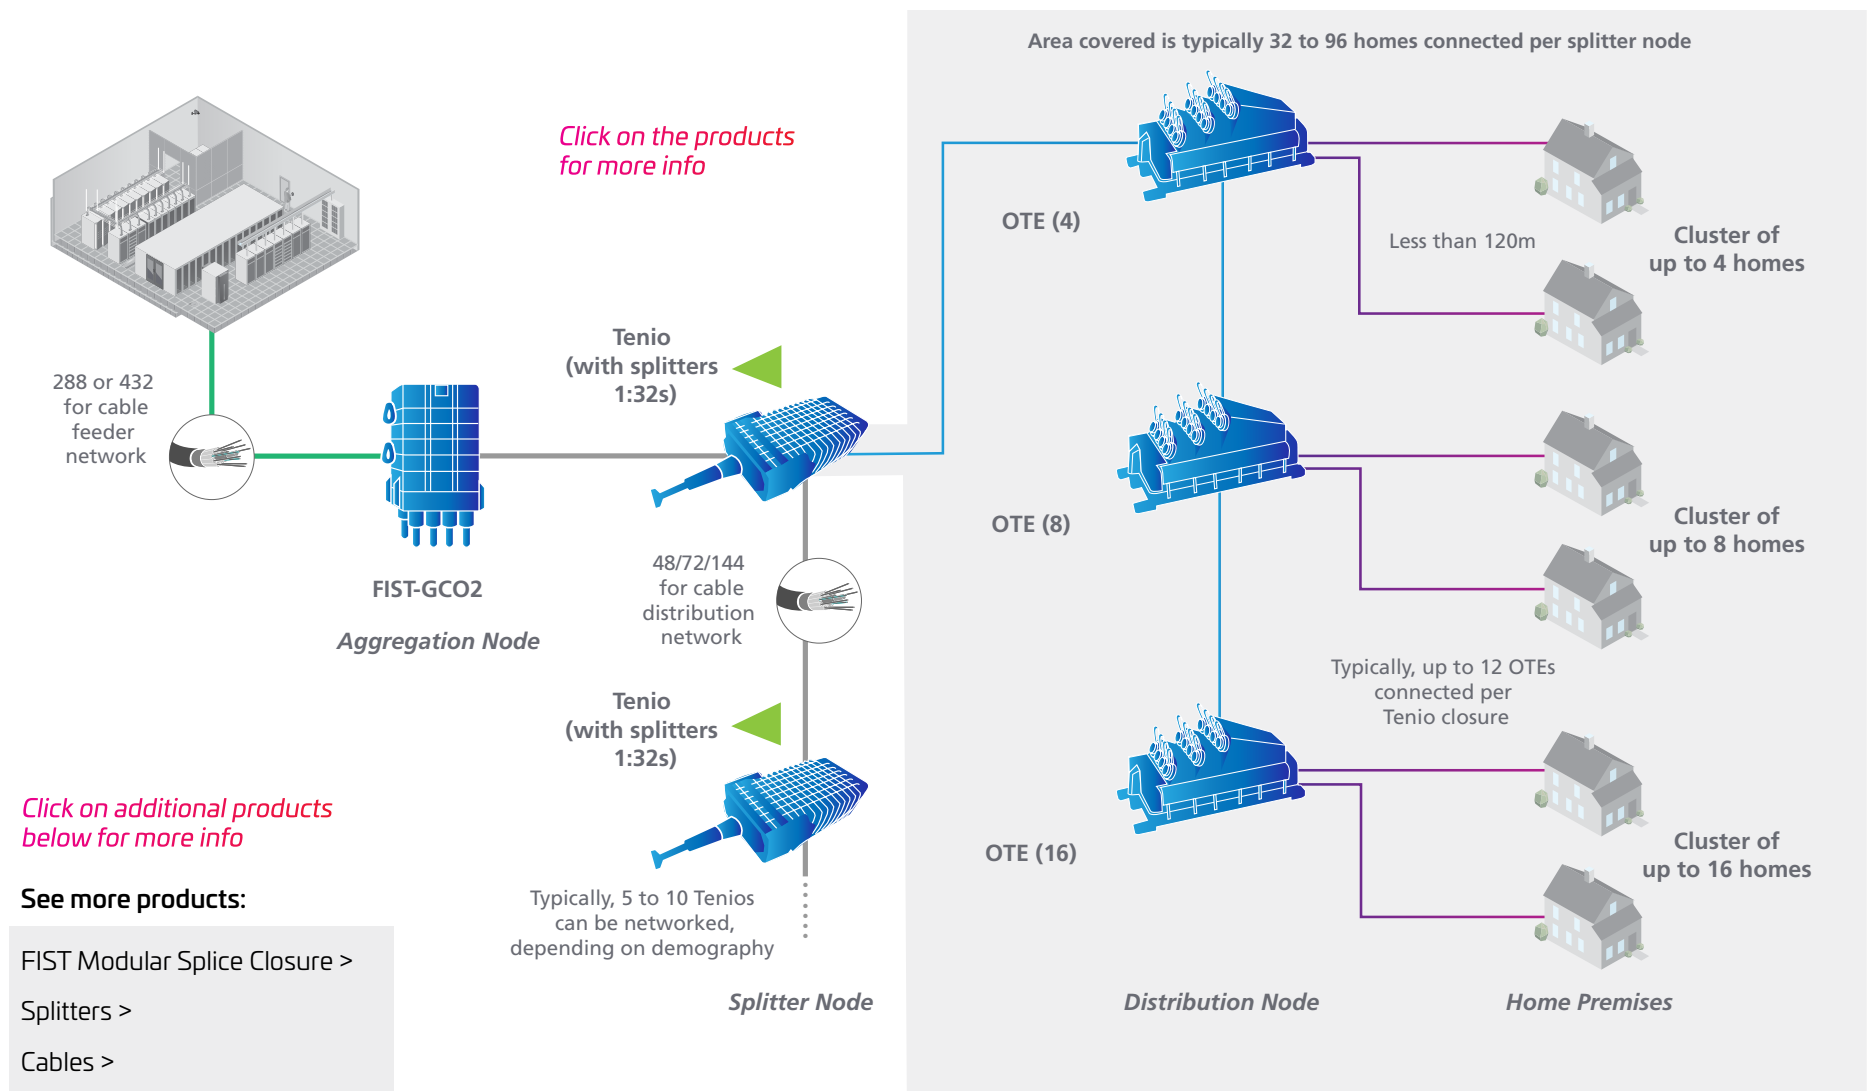

Cables: most common parts

Part number	Description
B-024-LN-8W-M12NS/15G	LightScope ZWP® Blown Micro Single Jacket All-Dielectric Outdoor Stranded Loose Tube Arid-Core® Construction Cable

Tenio—most common parts

Part number	Description
Tenio domes fully loaded with trays	
TENIO-B6-S12-12-N	Small size Tenio closure, loaded with 12 trays, 12 splices each tray.
TENIO-C6H-SLE-12-N	Large size Tenio closure, loaded with 12 trays, 24 splices each.
Cable sealings	
TENIO-SKG5-2/4	Sealing for cables between 2 and 4 mm (5 cables per sealing)
TENIO-SKG4-3/6	Sealing for cables between 3 and 6 mm (4 cables per sealing)
TENIO-SKG3-5/8	Sealing for cables between 5 and 8 mm (3 cables per sealing)
TENIO-SKG3-7/10	Sealing for cables between 7 and 10 mm (3 cables per sealing)
TENIO-SKG2-9/12	Sealing for cables between 9 and 12 mm (2 cables per sealing)
TENIO-SKG2-11/14	Sealing for cables between 11 and 14 mm (2 cables per sealing)
TENIO-SKG2-13/16	Sealing for cables between 13 and 16 mm (2 cables per sealing)
TENIO-SKG-DUMMY	Sealing for cables between 2 and 4 mm (5 cables per sealing)
CTUs (cable termination units)	
TENIO-CTU-S	Cable retention kit, used with cable seals TENIO-SKG5-2/4, TENIO-SKG4-3/6
TENIO-CTU-L	Cable retention kit, used with cable seals TENIO-SKG3-5/8, TENIO-SKG3-7/10, TENIO-SKG2-9/12, TENIO-SKG2-11/14, TENIO-SKG2-13/16, TENIO-SKG3-3/5x6/9
Mounting Bracket	
TENIO-MOBRA	Mounting bracket for wall and pole mount
External cable fixation bracket	
TENIO-EXT/CF	External cable fixation bracket

FIST Modular Splice closure—most common parts

Part number	Description
FIST-MSD Dome closure without trays	
FIST-MSD-C8-N	MSD dome closure C-size, no test valve. No trays (capacity for 40 trays, 480 splices)
FIST-MSD-D8-N	MSD dome closure D-size, no test valve. No trays (capacity for 72 trays, 864 splices)
FIST-MSD-E8-N	MSD dome closure E-size, no test valve. No trays (capacity for 104 trays, 1248 splices)
Splice Trays	
FIST-SOSA2-8SLE-S	WGP 8UMS and 8SLE Splice trays (96 splices, 12 splices each tray)
FIST-SOSA2-4SLE-S	WGP 4UMS and 4SLE Splice tray (48 splices, 12 splices each tray)
Cable sealings	
MSC-SKG8-1/5	Sealing kit for 8 cables of diameters between 1 and 5 mm
MSC-SKG8-4/7-11	Sealing kit for 4 cables of diameters between 4 and 11 mm
MSC-SKG3-6/14	Sealing kit for 3 cables of diameters between 6 and 14 mm
MSC-SKG2-14/18	Sealing kit for 2 cables of diameters between 14 and 18 mm
MSC-SKG2-18/22	Sealing kit for 3 cables of diameters between 18 and 22 mm
MSC-SKG1-21/27	Sealing kit for 1 cable of diameter between 21 and 27mm
MSC-SKG-DUMMY	Dummy seal
Cable retention units	
CTU-S	Cable termination unit for cables up to 7 mm
CTU-L	Cable termination unit for cables up to 16 mm
CTU-G	Cable termination unit for cables up to 27 mm
CTU-G-GRND	Cable termination unit for cables up to 27 mm, with grounding wire
Closure mounting bracket	
MSC-MOBRA	Wall/pole mounting kit
External fixation bracket	
MSC-EXT/CF	External cable/tube fixation bracket, including 8 tie wraps and 2 hose clamps

Tenio—most common parts

Part number	Description
Tenio domes fully loaded with trays	
TENIO-B6-S12-12-N	Small size Tenio closure, loaded with 12 trays, 12 splices each tray.
TENIO-C6H-SLE-12-N	Large size Tenio closure, loaded with 12 trays, 24 splices each.
Cable sealings	
TENIO-SKG5-2/4	Sealing for cables between 2 and 4 mm (5 cables per sealing)
TENIO-SKG4-3/6	Sealing for cables between 3 and 6 mm (4 cables per sealing)
TENIO-SKG3-5/8	Sealing for cables between 5 and 8 mm (3 cables per sealing)
TENIO-SKG3-7/10	Sealing for cables between 7 and 10 mm (3 cables per sealing)
TENIO-SKG2-9/12	Sealing for cables between 9 and 12 mm (2 cables per sealing)
TENIO-SKG2-11/14	Sealing for cables between 11 and 14 mm (2 cables per sealing)
TENIO-SKG2-13/16	Sealing for cables between 13 and 16 mm (2 cables per sealing)
TENIO-SKG-DUMMY	Sealing for cables between 2 and 4 mm (5 cables per sealing)
CTUs (cable termination units)	
TENIO-CTU-S	Cable retention kit, used with cable seals TENIO-SKG5-2/4, TENIO-SKG4-3/6
TENIO-CTU-L	Cable retention kit, used with cable seals TENIO-SKG3-5/8, TENIO-SKG3-7/10, TENIO-SKG2-9/12, TENIO-SKG2-11/14, TENIO-SKG2-13/16, TENIO-SKG3-3/5x6/9
Mounting Bracket	
TENIO-MOBRA	Mounting bracket for wall and pole mount
External cable fixation bracket	
TENIO-EXT/CF	External cable fixation bracket

Cables: most common parts

Part number	Description
B-024-LN-8W-M12NS/15G	LightScope ZWP® Blown Micro Single Jacket All-Dielectric Outdoor Stranded Loose Tube Arid-Core® Construction Cable
B-048-LN-8W-M12NS/15G	LightScope ZWP® Blown Micro Single Jacket All-Dielectric Outdoor Stranded Loose Tube Arid-Core® Construction Cable
B-072-LN-8W-M12NS/15G	LightScope ZWP® Blown Micro Single Jacket All-Dielectric Outdoor Stranded Loose Tube Arid-Core® Construction Cable
B-096-LN-8W-M12NS/15G	LightScope ZWP® Blown Micro Single Jacket All-Dielectric Outdoor Stranded Loose Tube Arid-Core® Construction Cable
B-144-LN-8W-M12NS/15G	LightScope ZWP® Blown Micro Single Jacket All-Dielectric Outdoor Stranded Loose Tube Arid-Core® Construction Cable
B-144-LN-8F-M24NS/17 200	LightScope ZWP® Blown Micro Single Jacket All-Dielectric Outdoor Stranded Loose Tube 200um Fiber Arid-Core® Construction Cable
B-192-LN-8F-M24NS/17T 200	LightScope ZWP® Blown Micro Single Jacket All-Dielectric Outdoor Stranded Loose Tube 200um Fiber Arid-Core® Construction Cable
B-216-LN-8F-M24NS/17T 200	LightScope ZWP® Blown Micro Single Jacket All-Dielectric Outdoor Stranded Loose Tube 200um Fiber Arid-Core® Construction Cable
B-288-LN-8F-M24NS/17T 200	LightScope ZWP® Blown Micro Single Jacket All-Dielectric Outdoor Stranded Loose Tube 200um Fiber Arid-Core® Construction Cable
O-024-LN-8W-M12NS/20G/BK	LightScope ZWP® Mini Single Jacket All-Dielectric Outdoor Cable, 2–144 fiber Arid Core construction, stranded loose tube
O-048-LN-8W-M12NS/20G/BK	LightScope ZWP® Mini Single Jacket All-Dielectric Outdoor Cable, 2–144 fiber Arid Core construction, stranded loose tube
O-072-LN-8W-M12NS/20G/BK	LightScope ZWP® Mini Single Jacket All-Dielectric Outdoor Cable, 2–144 fiber Arid Core construction, stranded loose tube
O-096-LN-8W-M12NS/20G/BK	LightScope ZWP® Mini Single Jacket All-Dielectric Outdoor Cable, 2–144 fiber Arid Core construction, stranded loose tube
O-144-LN-8W-M12NS/20G/BK	LightScope ZWP® Mini Single Jacket All-Dielectric Outdoor Cable, 2–144 fiber Arid Core construction, stranded loose tube
O-024-LA-8W-M12NS/20G/BK	LightScope ZWP® Mini Single Jacket/Single Armor, Gel-Filled, Outdoor Stranded Loose Tube Cable
O-048-LA-8W-M12NS/20G/BK	LightScope ZWP® Mini Single Jacket/Single Armor, Gel-Filled, Outdoor Stranded Loose Tube Cable
O-072-LA-8W-M12NS/20G/BK	LightScope ZWP® Mini Single Jacket/Single Armor, Gel-Filled, Outdoor Stranded Loose Tube Cable
O-096-LA-8W-M12NS/20G/BK	LightScope ZWP® Mini Single Jacket/Single Armor, Gel-Filled, Outdoor Stranded Loose Tube Cable
O-144-LA-8W-M12NS/20G/BK	LightScope ZWP® Mini Single Jacket/Single Armor, Gel-Filled, Outdoor Stranded Loose Tube Cable
S-024-LN-8W-M06NS/NFB	LightScope ZWP® All-Dielectric Self-Supporting Outdoor Cable, 2–60 fiber Arid Core construction, stranded loose tube
S-048-LN-8W-M12NS/NFB	LightScope ZWP® All-Dielectric Self-Supporting Outdoor Cable, 2–60 fiber Arid Core construction, stranded loose tube
S-072-LN-8W-M12NS/MHB	LightScope ZWP® All-Dielectric Self-Supporting Outdoor Cable, 6–144 fiber Arid Core construction, stranded loose tube
S-096-LN-8W-M12NS/MHB	LightScope ZWP® All-Dielectric Self-Supporting Outdoor Cable, 6–144 fiber Arid Core construction, stranded loose tube
S-144-LN-8W-M12NS/MHB	LightScope ZWP® All-Dielectric Self-Supporting Outdoor Cable, 6–144 fiber Arid Core construction, stranded loose tube

Tenio—most common parts

Part number	Description
Tenio domes fully loaded with trays	
TENIO-B6-S12-12-N	Small size Tenio closure, loaded with 12 trays, 12 splices each tray.
TENIO-C6H-SLE-12-N	Large size Tenio closure, loaded with 12 trays, 24 splices each.
Cable sealings	
TENIO-SKG5-2/4	Sealing for cables between 2 and 4 mm (5 cables per sealing)
TENIO-SKG4-3/6	Sealing for cables between 3 and 6 mm (4 cables per sealing)
TENIO-SKG3-5/8	Sealing for cables between 5 and 8 mm (3 cables per sealing)
TENIO-SKG3-7/10	Sealing for cables between 7 and 10 mm (3 cables per sealing)
TENIO-SKG2-9/12	Sealing for cables between 9 and 12 mm (2 cables per sealing)
TENIO-SKG2-11/14	Sealing for cables between 11 and 14 mm (2 cables per sealing)
TENIO-SKG2-13/16	Sealing for cables between 13 and 16 mm (2 cables per sealing)
TENIO-SKG-DUMMY	Sealing for cables between 2 and 4 mm (5 cables per sealing)
CTUs (cable termination units)	
TENIO-CTU-S	Cable retention kit, used with cable seals TENIO-SKG5-2/4, TENIO-SKG4-3/6
TENIO-CTU-L	Cable retention kit, used with cable seals TENIO-SKG3-5/8, TENIO-SKG3-7/10, TENIO-SKG2-9/12, TENIO-SKG2-11/14, TENIO-SKG2-13/16, TENIO-SKG3-3/5x6/9
Mounting Bracket	
TENIO-MOBRA	Mounting bracket for wall and pole mount
External cable fixation bracket	
TENIO-EXT/CF	External cable fixation bracket

FIST Modular Splice closure—most common parts

Part number	Description
FIST-MSD Dome closure without trays	
FIST-MSD-C8-N	MSD dome closure C-size, no test valve. No trays (capacity for 40 trays, 480 splices)
FIST-MSD-D8-N	MSD dome closure D-size, no test valve. No trays (capacity for 72 trays, 864 splices)
FIST-MSD-E8-N	MSD dome closure E-size, no test valve. No trays (capacity for 104 trays, 1248 splices)
Splice Trays	
FIST-SOSA2-8SLE-S	WGP 8UMS and 8SLE Splice trays (96 splices, 12 splices each tray)
FIST-SOSA2-4SLE-S	WGP 4UMS and 4SLE Splice tray (48 splices, 12 splices each tray)
Cable sealings	
MSC-SKG8-1/5	Sealing kit for 8 cables of diameters between 1 and 5 mm
MSC-SKG8-4/7-11	Sealing kit for 4 cables of diameters between 4 and 11 mm
MSC-SKG3-6/14	Sealing kit for 3 cables of diameters between 6 and 14 mm
MSC-SKG2-14/18	Sealing kit for 2 cables of diameters between 14 and 18 mm
MSC-SKG2-18/22	Sealing kit for 3 cables of diameters between 18 and 22 mm
MSC-SKG1-21/27	Sealing kit for 1 cable of diameter between 21 and 27mm
MSC-SKG-DUMMY	Dummy seal
Cable retention units	
CTU-S	Cable termination unit for cables up to 7 mm
CTU-L	Cable termination unit for cables up to 16 mm
CTU-G	Cable termination unit for cables up to 27 mm
CTU-G-GRND	Cable termination unit for cables up to 27 mm, with grounding wire
Closure mounting bracket	
MSC-MOBRA	Wall/pole mounting kit
External fixation bracket	
MSC-EXT/CF	External cable/tube fixation bracket, including 8 tie wraps and 2 hose clamps

Appendix

Centralized split topology

Centralized Split topology uses a single stage splitter (typically 1:32 in GPON) located in the outside plant. Typically, this splitter can be either a connectorized splitter in an outdoor cabinet, or a spliced splitter in an underground closure. The input fibre for a centralized splitter comes from an OLT port in the central office. Sometimes, there is also a first 1:2 splitter in the central office. The output fibres go directly to each home.

Pros

- Pay as you grow
- Easier to change with future technology changes
- Simpler to monitor and maintain

Cons

- More distribution fibre needed

Distributed split topology

Distributed Split topology uses two and, in rare cases, even up to three levels of splitting. The splitters are located in the outside plant network. This approach may use a 1:8 spliced splitter residing in an underground closure, directly connected to an OLT. The second level, can be either a spliced or a connectorized splitter, depending on the network topology.

Pros

- Lower CAPEX
- Fast customer activation

Cons

- Higher active CAPEX
- Harder to change in the future
- Harder to monitor and maintain

Standard connectivity

Optical connectors/adapters and splices are inside the closures. They require re-entry every time a new customer needs to be connected.

Pros

- Commonly used in the industry
- Known installation practices

Cons

- Requires closure opening to connect customers with risk of poor re-sealing
- Risk of disturbing service while touching fibres when connecting new customers
- Cable routing depends on the installers' expertise

Hardened connectivity

Outside adapters are used to access the inside connectors. The terminals require no opening when connecting new customers.

Pros

- Day 1 splicing only without disturbance of existing customers for new connections
- Sealed and protected connections above and underground
- Faster and easier drop cable connections

Cons

- More complex logistics for drop cables

Standard connectivity

Optical connectors/adapters and splices are inside the closures. They require re-entry every time a new customer needs to be connected.

Pros

- Commonly used in the industry
- Known installation practices

Cons

- Requires closure opening to connect customers with risk of poor re-sealing
- Risk of disturbing service while touching fibres when connecting new customers
- Cable routing depends on the installers' expertise

Hardened connectivity

Outside adapters are used to access the inside connectors. The terminals require no opening when connecting new customers.

Pros

- Day 1 splicing only without disturbance of existing customers for new connections
- Sealed and protected connections above and underground
- Faster and easier drop cable connections

Cons

- More complex logistics for drop cables

Traditional MDU topology

Uses multifibre riser cable that is spliced and connectorized in a terminal box located in the basement. This cable is opened at every floor and spliced/connectorized inside a distribution floor box.

Pros

- Used widely in the industry
- Lower CAPEX

Cons

- Requires splicing and cable preparation on every floor level
- Higher risk of fibre cable failures and disconnections

Rapid MDU topology

Uses CommScope Rapid Reel technology and provides an alternative riser concept in MDUs. Each floor distribution box has its own cable to the basement terminal box.

Pros

- Eliminates the need to pre-measure for and order fixed-length intra facility cable
- Reduces installation time by 60%
- Solves slack storage problem because any unused cable is stored on the internal reel

Cons

- Higher CAPEX
- Not effective in buildings where ducts are too narrow or crowded

Centralized split topology

Centralized Split topology uses a single stage splitter (typically 1:32 in GPON,) located in the outside plant. Typically, this splitter can be either a connectorized splitter in an outdoor cabinet or a spliced splitter in an underground closure. The input fibre for a centralized splitter comes from an OLT port in the central office. Sometimes, there is also a first 1:2 splitter in the central office. The output fibres go directly to each home.

Pros

- Pay as you grow
- Easier to change with future technology changes
- Simpler to monitor and maintain

Cons

- More distribution fibre needed

Distributed split topology

Distributed Split topology uses two, and in rare cases, even as many as three levels of splitting. The splitters are located in the outside plant network. This approach may use a 1:8 spliced splitter residing in an underground closure, directly connected to an OLT. The second level can be either a spliced or a connectorized splitter, depending on the network topology.

Pros

- Lower CAPEX
- Fast customer activation

Cons

- Higher active CAPEX
- Harder to change in the future
- Harder to monitor and maintain

Standard connectivity

Optical connectors/adapters and splices are inside the closures. They require re-entry every time a new customer needs to be connected.

Pros

- Commonly used in the industry
- Known installation practices

Cons

- Requires closure opening to connect customers with risk of poor re-sealing
- Risk of disturbing service while touching fibres when connecting new customers
- Cable routing depends on the installers' expertise

Hardened connectivity

Outside adapters are used to access the inside connectors. The terminals require no opening when connecting new customers.

Pros

- Day 1 splicing only without disturbance of existing customers for new connections
- Sealed and protected connections above and underground
- Faster and easier drop cable connections

Cons

- More complex logistics for drop cables

Navigation tips.

Use the decision tree diagrams **1** to help you choose from the various topologies. Select a topology **2** to take you to that topology screen. **3** There, you can select parts **4** taking you to the parts screen **5** for the part you've selected. This parts screen **5** will list the most common parts for your selection.

Click on the navigation buttons at the bottom of the screen **6** to return to the topologies and decision trees.

TENIO-SKG2-9/12(D)	Sealing for cables between 9 and 12 mm (2 cables per sealing)
TENIO-SKG2-11/14(D)	Sealing for cables between 11 and 14 mm (2 cables per sealing)
TENIO-SKG2-13/16(D)	Sealing for cables between 13 and 16 mm (2 cables per sealing)
TENIO-SKG-DUMMY	Sealing for cables between 2 and 4 mm (5 cables per sealing)
CTUs (cable termination units)	
TENIO-CTU-S	Cable termination kit for diameters of cable up to 6mm
TENIO-CTU-L	Cable termination kit for diameters of cable up to 16mm
Mounting Bracket	
TENIO-MDBRA	Mounting bracket for wall and pole mount
External cable fixation bracket	
TENIO-EXT/CF	External cable fixation bracket

Navigation tips

Use the decision tree diagrams **1** to help you choose from the various topologies. Select a topology **2** to take you to that topology screen.

3 There, you can select parts **4** taking you to the parts screen **5** for the part you've selected. This parts screen **5** will list the most common parts for your selection.

Click on the navigation buttons at the bottom of the screen **6** to return to the topologies and decision trees.

Feeder and distribution: decision tree

Feeder and distribution network | 01 Centralized, standard, mid-span—parts

Tenio—most common parts

Part Number	Description
Tenio domes fully loaded with trays	
TENIO-B6-S12-12-N	Small size Tenio closure, loaded with 12 trays, 12 splices each tray.
TENIO-GH-S12-12-N	Large size Tenio closure, loaded with 12 trays, 24 splices each.
Cable sealings	
TENIO-SKG5-2/4(D)	Sealing for cables between 2 and 4 mm (5 cables per sealing)
TENIO-SKG4-3/6(D)	Sealing for cables between 3 and 6 mm (4 cables per sealing)
TENIO-SKG3-5/8(D)	Sealing for cables between 5 and 8 mm (3 cables per sealing)
TENIO-SKG3-7/10(D)	Sealing for cables between 7 and 10 mm (3 cables per sealing)
TENIO-SKG2-9/12(D)	Sealing for cables between 9 and 12 mm (2 cables per sealing)
TENIO-SKG2-11/14(D)	Sealing for cables between 11 and 14 mm (2 cables per sealing)
TENIO-SKG2-13/16(D)	Sealing for cables between 13 and 16 mm (2 cables per sealing)
TENIO-SKG-DUMMY	Sealing for cables between 2 and 4 mm (5 cables per sealing)
CTUs (cable termination units)	
TENIO-CTU-S	Cable termination kit for diameters of cable up to 6mm
TENIO-CTU-L	Cable termination kit for diameters of cable up to 16mm
Mounting Bracket	
TENIO-MDBRA	Mounting bracket for wall and pole mount
External cable fixation bracket	
TENIO-EXT/CF	External cable fixation bracket
